Description

145 Litre Plastic Trough with Mobile Frame

These industrial quality, food-grade plastic troughs are widely used in the food manufacturing and food processing industries for the storage and handling of liquid or dry ingredients and produce.

Seamless, robust construction makes it easy to keep the troughs hygienically clean.

They can also be used for washing food produce and kitchen utensils and are supplied with a waste hole indentation for fitting a sink waste unit.

The troughs come in a wide variety of colours and are a useful addition to any colour coding system.

Static or mobile frames, made of stainless steel or mild steel, are also available to bring the trough to a comfortable height for operators.

The optional lid provides secure storage of sensitive contents and helps to avoid spills.
