The Platinum Range

PLT-AO 60 - 15 drawer

PLT-A1 75 10 drawer

Specifics:

High quality Steel construction
New Quad-Pro bearing system incorporating
heavy duty steel bearings with 2mm runners
Fully locking
Mechanical Anti-tilt system with life time guarantee
2 x drawer front combinations
Any RAL colour finish

The Platinum range is an all steel construction cabinet with heavy duty runner system which can range from 35kg to 120kg per drawer. The cabinet also features a unique mechanical anti-tilt mechanism which even under extreme use has life time properties. The Platinum range comes with two drawer front designs to give options on the finished look and comes in a wide range of colours. The cabinets are British built and have a unique internal frame system for total rigidity.

PLT-AO 75 - 10 drawer

If you are interested in any of the Platinum Range Cabinets, get in contact with us and we'll be happy to discuss your project and how X-Treme Systems can help you.
