

About Beam Seating

Rhubarb Solutions offers one of the most comprehensive ranges of beam seating, with products suitable for every environment where this type of seating solution is required.

Voyage (pictured left) is an exceptionally robust but also stylish range designed to put up with harshest of environments as well as being widely used in public spaces where design statements are required.

Prima beam is part of the wider Prima family, built with strength, durability and design as core values and a frequent choice for hospital A&E facilities which demand the ability to withstand heavy usage.

Kopio and Mata provide easy clean, stylish solutions for any public space.

Environments

- Healthcare waiting zones
- Hospital A&E departments
- Public spaces
- High traffic spaces
- Corridor seating
- Reception areas

Technical Data

Range dependent, however we have solutions that deliver:

- 32 stone per seat capability
- A&E suitable
- Wipe clean, soil-proof surfaces (complies with CQC guidelines for GP waiting rooms)
- Floor fixing
- Free standing
- Tip up seats
- Metal vandal-resistant seats and frames
- Tables in place of seat units
- Optional individual or end of unit arms
