

About Century

Century is our entry point task seating range and comes with a height adjustable back and PCB 2-lever action as standard features. In addition, there is a wide range of options available to cater for a variety of needs, including a junior version and a cantilever frame for use as a visitor or meeting chair.

Even as an entry level product, Century still upholds the ethos of Rhubarb Solutions. It is manufactured at our Thame factory and provides excellent support, with deep contract grade CMHR foam.

Customers seeking to use this range as a stock solution can take advantage of our 'Batch10' discount model.
