

About Nature

The design for this task chair is taken from nature and inspired by the shape of a tree. The back support is formed around a central "trunk" with the leaf-shaped lumbar adjustments supported on the branches. The unique mesh with its window pattern frames the view of the tree as if through a window.

As well as its aesthetics, Nature is a superbly engineered task chair which provides excellent ergonomic support with elastic mesh and fully adjustable lumbar support.

Nature is also available as a visitor chair on a cantilever frame.

Environments

- Office
- All environments requiring task-based seating
- Meeting and training zones

Technical Data

- Task Chair Dimensions:
 - Height: 1030-1120mm
 - Width: 500mm
