ECO is committed to lowering its impact on the environment, our recycling system is for its manufactured products, ECO will collect and recycle its products when requested free of charge.

ECO uses particle board, MDF, fibre board and all wood products from eco friendly forestry sourced from farmed and sustainable plantations.

Foam and fabric components comply with (Fire) (Safety) Regulations S.I. 1324 1989, BS 476, Part 7, Class 1 or BS5852 Class 0, 1, or BS 7176: 2007.

Products that at the design stage have components with sound reducing qualities designed into them to help combat office noise pollution, suitable for quiet rooms and quiet areas.

This product range can be modified to suit your needs as may be required by the customer from time to time.

We confirm our product guarantees against fair wear for the period shown. All products is supplied fit for purpose intended.

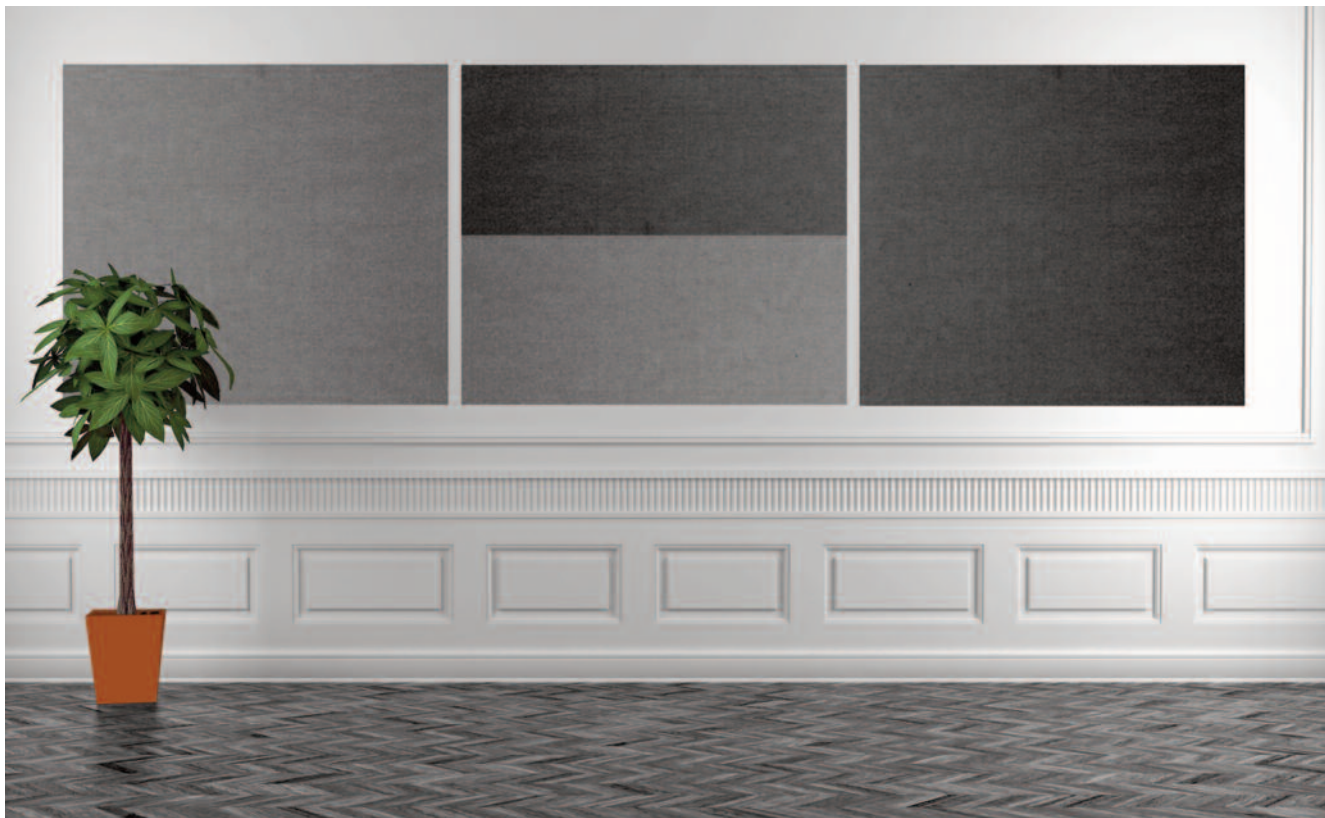

APS Acoustic Partition Screens

APS screens are excellent acoustic screens and have been especially designed to help combat office noise pollution with its superior soundproofing insulation.

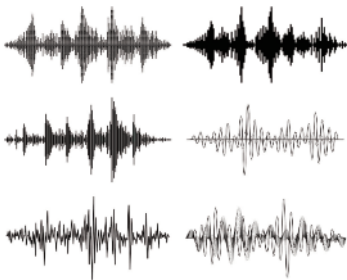

The mineral rock wool insulation used in the APS construction has no known negative environmental impact & has excellent acoustical dampening properties.

- Designed to combat office noise pollution
- Made from high density mineral wool
- Non-directional fibre orientation
- Mineral wool Quiet Mark TM approved
- Ideal for creating quiet rooms and quiet areas
- 4 heights from 180cm to 120cm
- 6 widths from 160cm to 80cm

The scientific process of sound waves is called *acoustics*.

Sounds exist in a variety of forms and travels at 767 miles per hour, sound waves bend when they hit obstacles and air stretches and extends the capacity of sound.

AWB Acoustic wall baffles

The AWB has three layers of materials, (fabric, foam & fibre board) each contributing to the reduction of sound waves as they pass through or bounce off the board.

- Designed to combat office noise pollution
- Quick and easy installation system
- fibre board sourced from sustainable plantations in Finland
- Ideal for creating quiet rooms and quiet areas

AWB 120/240

RT = Radius Top

Jubilee Linking System

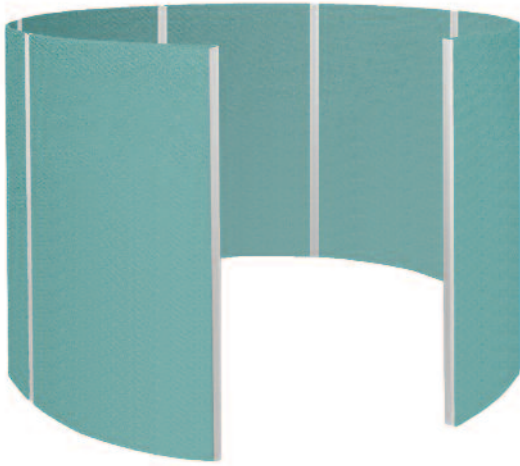

Patented linking system No. GB2421963.

The Jubilee linking system was designed to be quick and easy in use, but flexible, strong and sturdy in assembly.

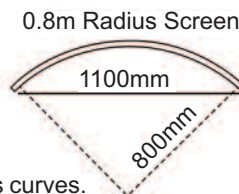

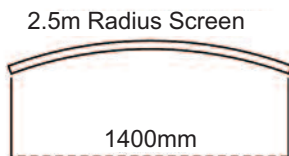

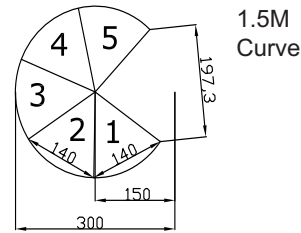

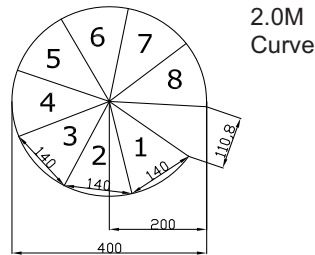

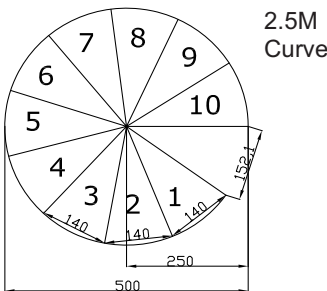

Linking the screens together is simple, the metal bars opposite fit into the brackets on the top and bottom of the screen where they lock securely.

Jubilee Curved Floor Dividers

- Four curved radius screens sizes
- meeting & quiet rooms created
- Heights up to 210cm
- 55mm thick divider screen

There are two choices of radius curves.

The 1st giving a shallow gentle curve over a distance of 1400mm. The 2nd is a tighter curve giving a complete 90deg angle over a distance of 1100mm and designed to go around an 800mm desk radius corner.

Jubilee Curved Floor Dividers

The Jubilee door has a heavy set steel frame which is 210cm high by 100cm wide including the Jubilee linking edges, the door is a varnished red wood veneer internal door 200cm by 80cm with lock and 3 keys.

The Jubilee door can be joined to other Jubilee screens to create a secure lockable room.

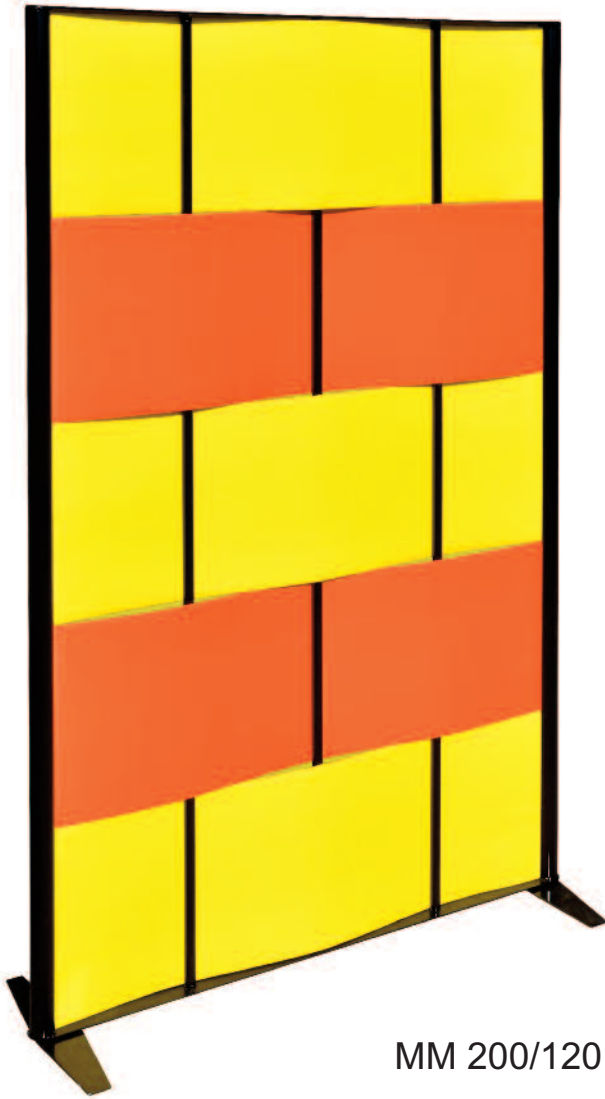

Merlin office dividers

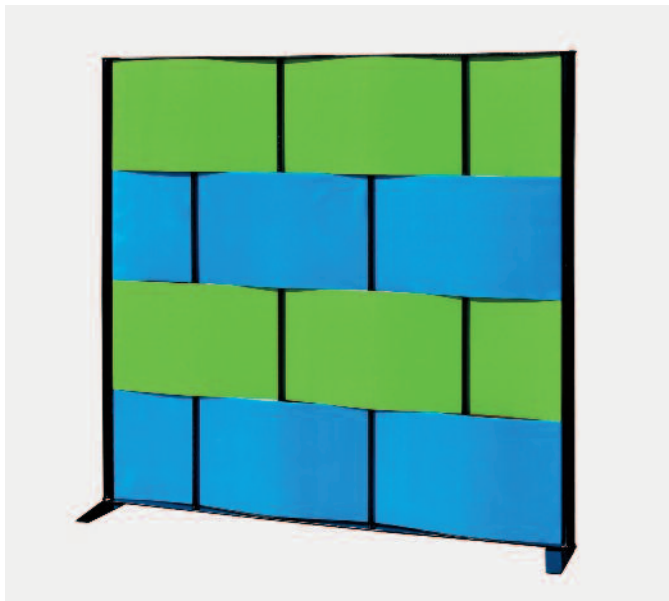

Merlin decorative screens are made with a steel outer frame and vertical steel shaping rods. The vertical shaping rods allow the twin wall MDF panels to snake around them in alternating directions to create a lattice effect.

There are three heights and two widths, with the height based around the 40cm MDF panel height. The steel frame comes in black as standard.

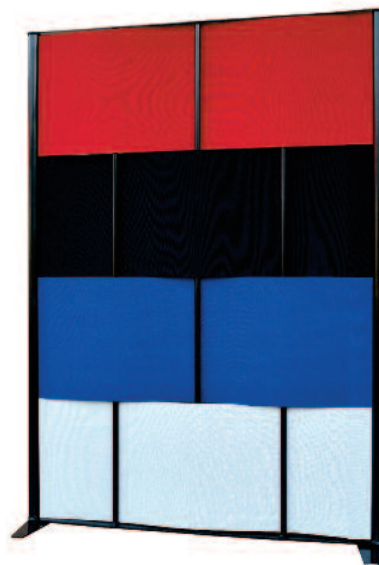

- 3 heights, 200cm, 160cm & 120cm
- 2 widths from 160cm & 120cm
- 1 or 2 fabric colours to your choice
- Black frame as standard
- Other frame colours to special order

Smarty Acrylic desktop screens

All Smarty Acrylic screens are made from a tough 6mm thick frosted acrylic and are supplied complete with a set of clamps.

The Smarty range of acrylic desktop screens come in clear frosted as standard or a range of colours, there are 3 shapes to choose from Oblong, Radius or Shape.

The full range of clamps can be viewed at the back of this price list on the accessories page.

Smarty Backdrop desk mounted screens

Smarty Backdrop screens are available in 3 heights and 3 top styles and whatever top style you choose the price remains the same.

Choose from 4 edge trim colours, light grey, dark grey, black and silver.

Backdrop screens are designed to go between desks which divides them as there is a further 20cm of screen dropping below the desk top, this extra 20cm overhang is excluded from the ordering size.

If you require 30cm above desk screen you will be supplied with a 50cm screen (30cm above 20cm below).

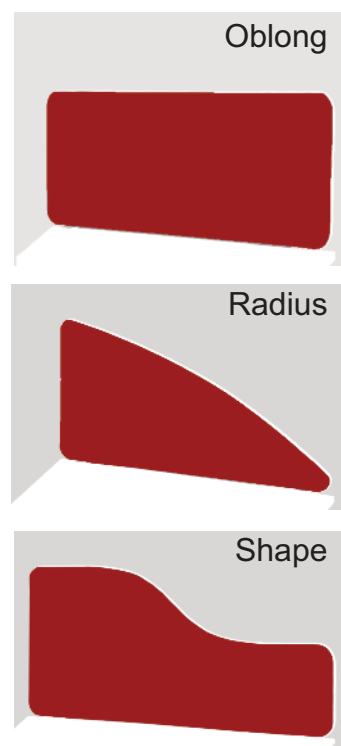

Smarty Fabric desktop screens

Smarty Fabric range of desktop screens are available in 3 heights, 7 widths and 3 top styles and whatever top style you choose the price remains the same.

To define your requirement for Oblong, Radius or Shape style please replace the * in the above product code by inserting O for Oblong, R for Radius and S for Shape style, followed by the height and then the length. e.g. SF* 40/160 for an Oblong style would become SFO 40/160.

There are 4 edge trim colours available, light grey, dark grey, black and silver.

Smarty Plus acoustic desktop screens

Smarty Plus Desktop Screens designed to reduce noise pollution in the office by employing seven layers of acoustic materials, in a 55mm thick screen .

All edges are covered in fabric to stop noise refraction and allowing the seven layers to further reduce sound every time the sound passes through the screen.

Smarty Plus screens are available in two heights 40cm and 50cm enabling a bigger footprint above the desk to further reduce the sound in the office.

Super acoustics

Desktop screen clamps

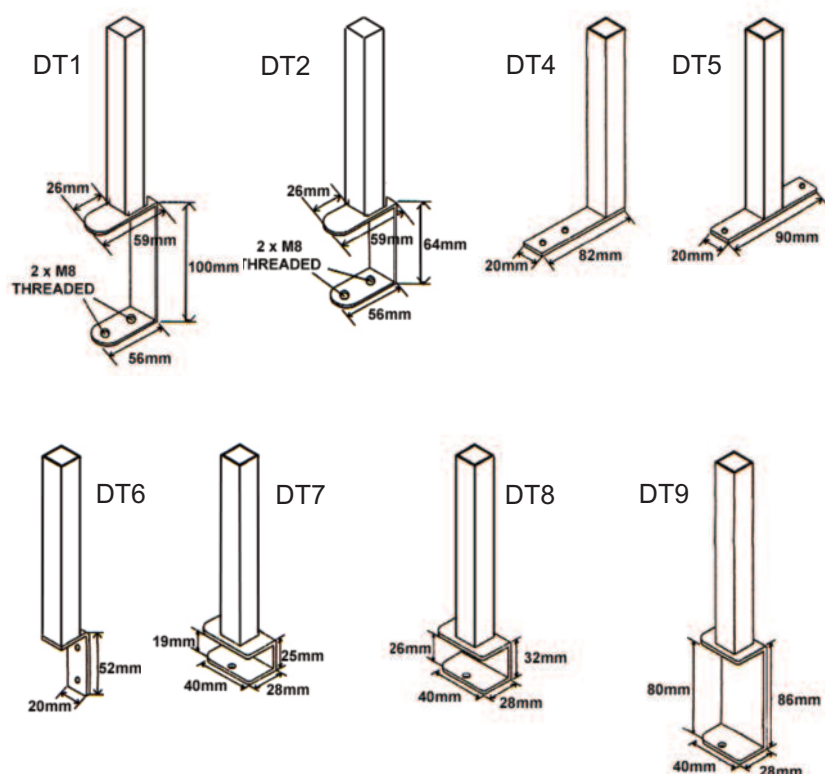

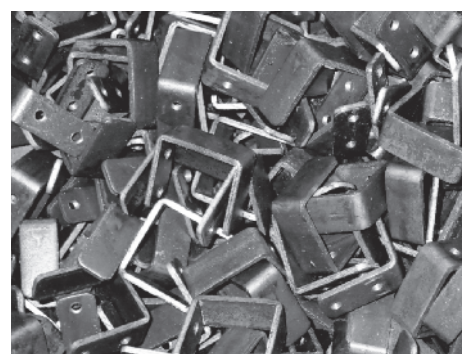

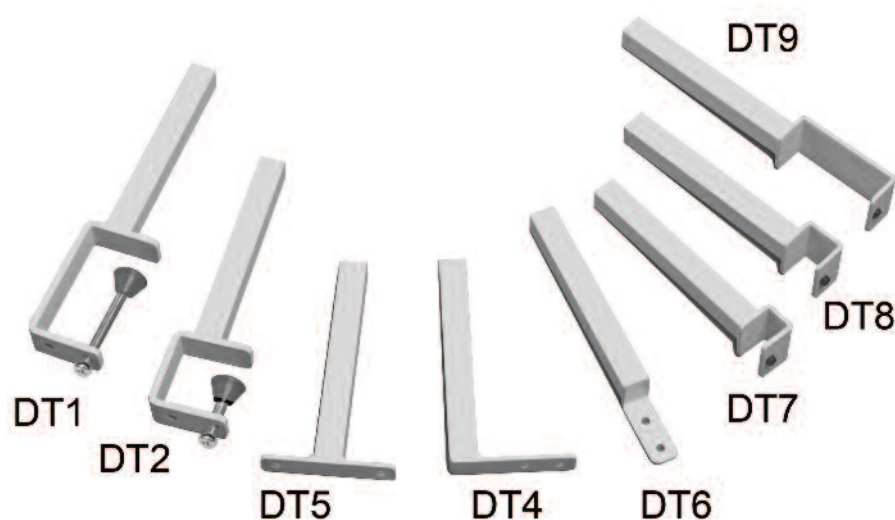

All desktop screens are supplied complete with one pair of clamps to your choice excluding special clamps. Below are the prices for sets supplied separately.

The DT clamp drawings shown below fit JDT, EPDT, RBDT and GDT desktop screens, the main clamp jaw design is generic and also applies to the SA, SF and SM clamps.

The clamps on this page have been designed to fit 98% of all standard desks, should these standard fixings not be suitable for your desks then we will resolve this by manufacturing bespoke clamps.

DT2

The DT2 clamps onto 85% of all desks we are asked to fit.

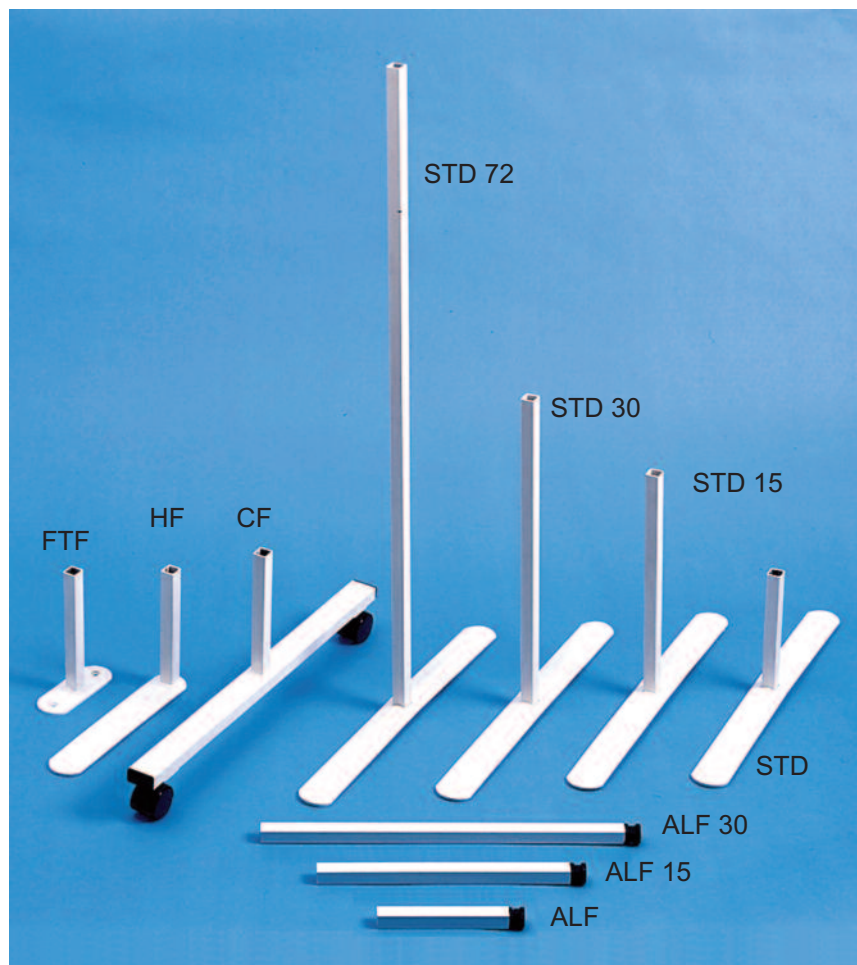

Clamp details

DT1, SA1, SF1 & SM1	30mm to 85mm
DT2, SA2, SF2 & SM2	18mm to 49mm
DTC2	18mm to 49mm
