

New to Merlin Industrial Products Ltd are the Extendable Diamond Barriers, perfect for providing security for public and private use. From construction sites to leisure industries, for permanent fixtures and temporary solutions.

These unique and innovative barriers are made from steel and have an attractive, retractable design with a quick and efficient installation.

A lightweight but robust nature, complemented by safety locks on the wheels, reducing chances of movement when they are positioned as stationary.

All barriers are fully tested, to maximise quality and safety which is a top priority. The Extendable Diamond Barriers consist of safety features; produced in high visibility yellow and high visibility reflectors for safety at night.
