

Fabrics

We have committed to stocking a range of 16 best-selling fabrics and 2 vinyls, which will allow us to offer customers an even faster turnaround across the seating range and tailor seating choices to customer's individual specifications.

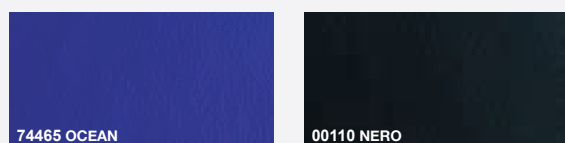

Xtreme from Camira is a modern crepe weave fabric made from 100% post-consumer recycled polyester, diverting waste from landfill and saving virgin raw materials. Its stretch properties, coupled with high flame retardancy, meeting BS5852 Ignition Source 5 make Xtreme an ever popular fabric for task seating for all contract, commercial and public sector use.

This colourful selection of fabric colours in the Camira Xtreme and Fresh Vinyl ranges can bring the corporate palette into the office interior, creating a cohesive look or even zone different areas.

Camira Xtreme

Fresh Vinyl

We aim to produce all made-to-order task & operator chairs in these priority fabrics within a 2-3 week lead time.

Fabric Pairings

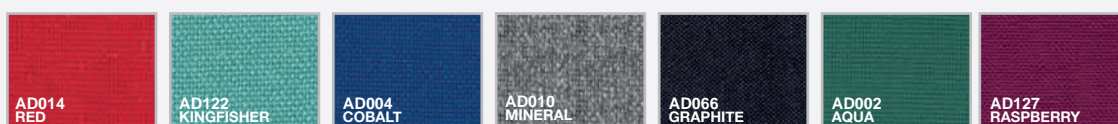

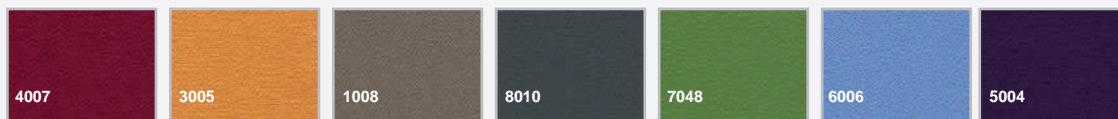

Camira Era is a subtle, two tone polyester fabric containing stretch in both directions for ease of upholstery. The baby herringbone weave offers an understated contemporary texture while its colouring technique provides close up intrigue.

The colourful palette incorporates playful brights and sophisticated muted tones, perfect for the modern office interior, creating a cohesive look or even zone different areas.

Virus management

Hygiene is crucial to keep any virus from spreading. In times like these we should all keep distance to other people, wash our hands and make sure our workspaces are clean. Above all you should always comply to the government guidelines from your local authority.

The World Health Organisation (WHO) states that the spread of COVID-19 happens most commonly through airborne respiratory droplets (which is why face masks are the first line of defence). Once a virus lands on a surface, its efficacy immediately starts to decline. You cannot be infected by just touching something because the virus needs to reach mucous membranes in the mouth, nose or eyes. It is therefore perfectly safe to touch any fabric surface as long as you wash your hands before you touch your face.

Within 24-48 hours, the majority of viruses have lost all infectious properties, and within a few days, they have dissipated altogether. The infectious portion of this lifespan is shorter again and research shows that porous surfaces with spaces in their construction, such as fabric, trap the virus preventing its transfer during the short window of time for which it is infectious. Fabrics and fully upholstered seating products are therefore unlikely to be major carriers of the COVID-19 virus.

Fabric Care

However, we recommend the same basic principles for care and maintenance continue to apply:

- Vacuum upholstery regularly to remove dust, dirt and crumbs
- Attend to stains quickly with a damp cloth
- Use branded upholstery shampoo for specific stains
- Periodically use specialist cleaning services eg dry cleaning

Most fabrics are all bleach cleanable with a 10% bleach chlorine solution (which will kill Coronavirus germs). There are also an increasing number of fabrics that are anti-microbial to protect against a wide range of bacteria which cause infection - such as MRSA, Salmonella and E.coli - which can cause serious additional ill health that must be avoided by anyone already battling a potentially lethal virus infection.

These fabrics can provide hygiene benefits in wide ranging commercial end-use areas, including healthcare, hospitality, education and contract office.

For further details contact our sales team or refer to the fabric manufacturer websites.

Fabric Usage

There are a wide choice of fabrics available and it is important that you select the right fabric for the application as well as creating the perfect finish to the chairs. Not all fabrics are suitable for soft seating / reception seating. Fabric banding and application pages show all fabrics grouped in the relevant pricing bands together with recommended usage. We cannot guarantee the finish of any chair that is ordered in fabric that is not recommended for that application.

Measurements

All measurements are in millimeters and can have a tolerance $\pm 12\text{mm}$ on all soft seating. Measurements may vary depending on components used and we reserve the right to change them from time to time.

Hazard ratings

Low - EN1021 Parts 1 & 2 cigarette and match
Medium - BS5852 Ignition source 5 / Crib 5

Photographed upholstery

While every effort is made to represent colours accurately, we cannot guarantee the colours you see exactly match the colours of the actual fabric due to printing processes.

Fabric bands

Please contact our sales team for a price if your preferred fabric choice is not listed. Please make sure you check the suitability of a fabric before recommending a product. If two fabrics are used on one item e.g. two-tone, the cost is calculated on higher of the two fabric bands. All orders for leather are priced on application.

Colour variations

Whilst every effort is made, no guarantees are made against the minor variations in the colour of commercial fabrics. All striped fabric will be upholstered vertically unless advised.

Customers own materials

Fabrics not listed or customer supplied fabrics need to be approved before acceptance of orders. A pattern charge may apply to some fabrics. We reserve the right to reject fabric that we believe to be unsuitable for the product. We are unable to guarantee any product meeting fire regulations or standards which is supplied by a customer.

Please contact our sales team if you would like any fabric samples sent out to you.

IMPORTANT INFORMATION

Ordering

As all products in the Social Spaces range are "made to order", it is our policy that once these products have been ordered they cannot be canceled or amended.

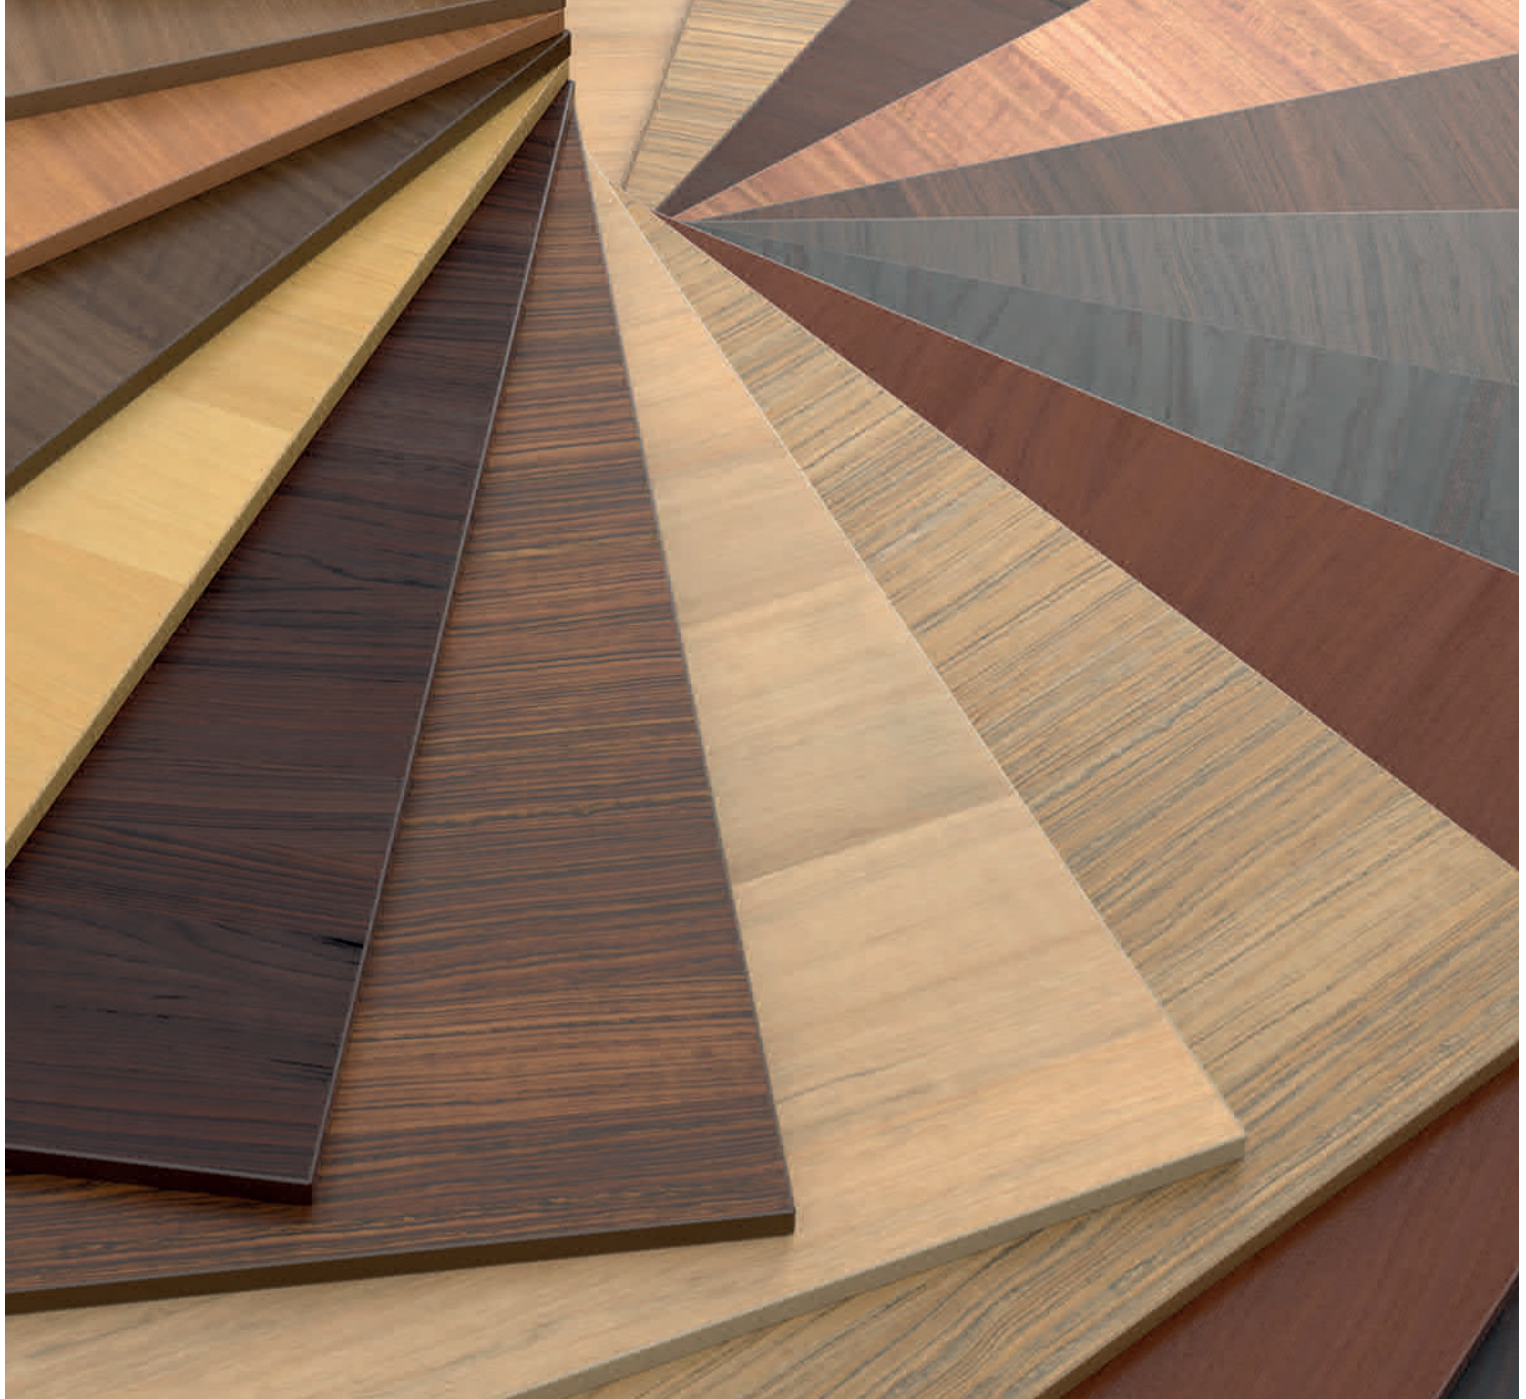

Pricing

All prices shown are in sterling (£) and are subject to current rate of VAT.

Warranty

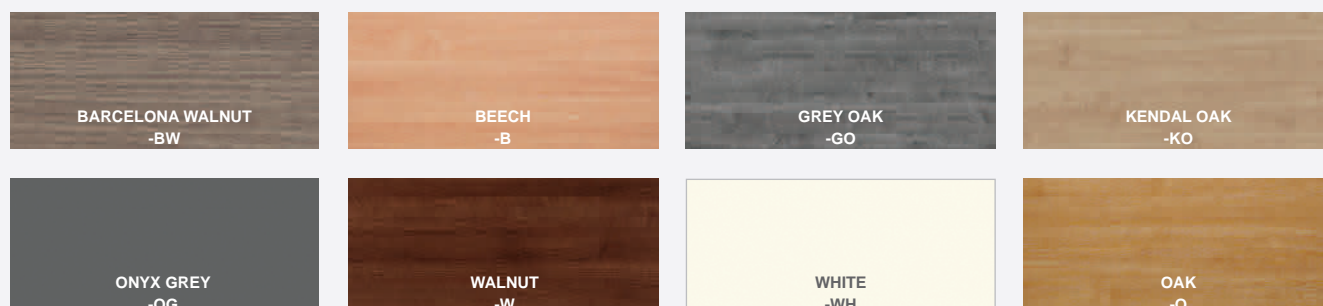

All Social Spaces products are guaranteed for a period of 5 years regardless of usage. All products are guaranteed against manufacturing defects, except for upholstery, castors and mechanisms which are subject to usage related wear and tear. The warranty is effective from the day the product leaves the factory and the supplier reserves the right not to apply the warranty in cases of inappropriate use or when a product has been tampered with by a third party or interventions by non-authorised personnel. All complaints concerning the goods must be made in writing and the company shall undertake to repair any product or part of a product that proves to be faulty.

Wood

Stocked MFC Finishes

We only use FSC-certified wood manufacturing our products in-house in the UK, with total traceability for every order. Constructed from a chipboard core and finished with a decorative melamine covering, MFC is a versatile product ideal for use with office furniture.

Made-to-order Laminate Finishes

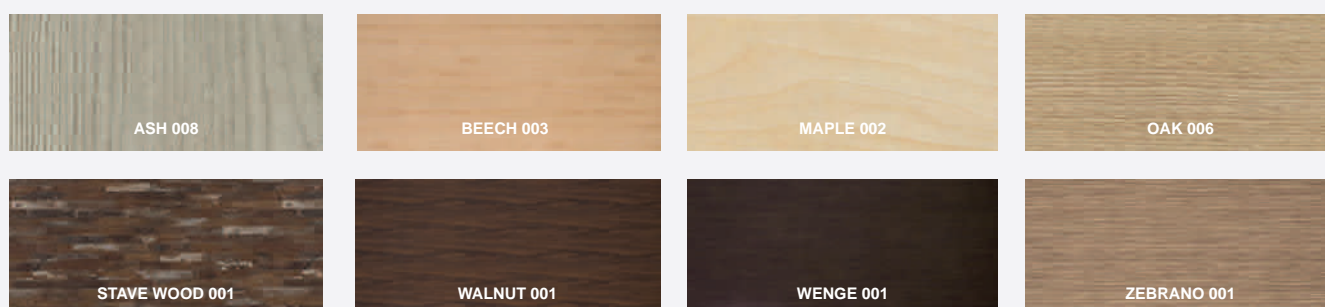

Altofina Collection

Dazzling and innovative decors, finishes and performance grades have been introduced to mingle with a selection of mainstream decorative laminates. The Altofina laminate collection creates interior spaces that are both brilliantly designed and commercially affordable.

Colours

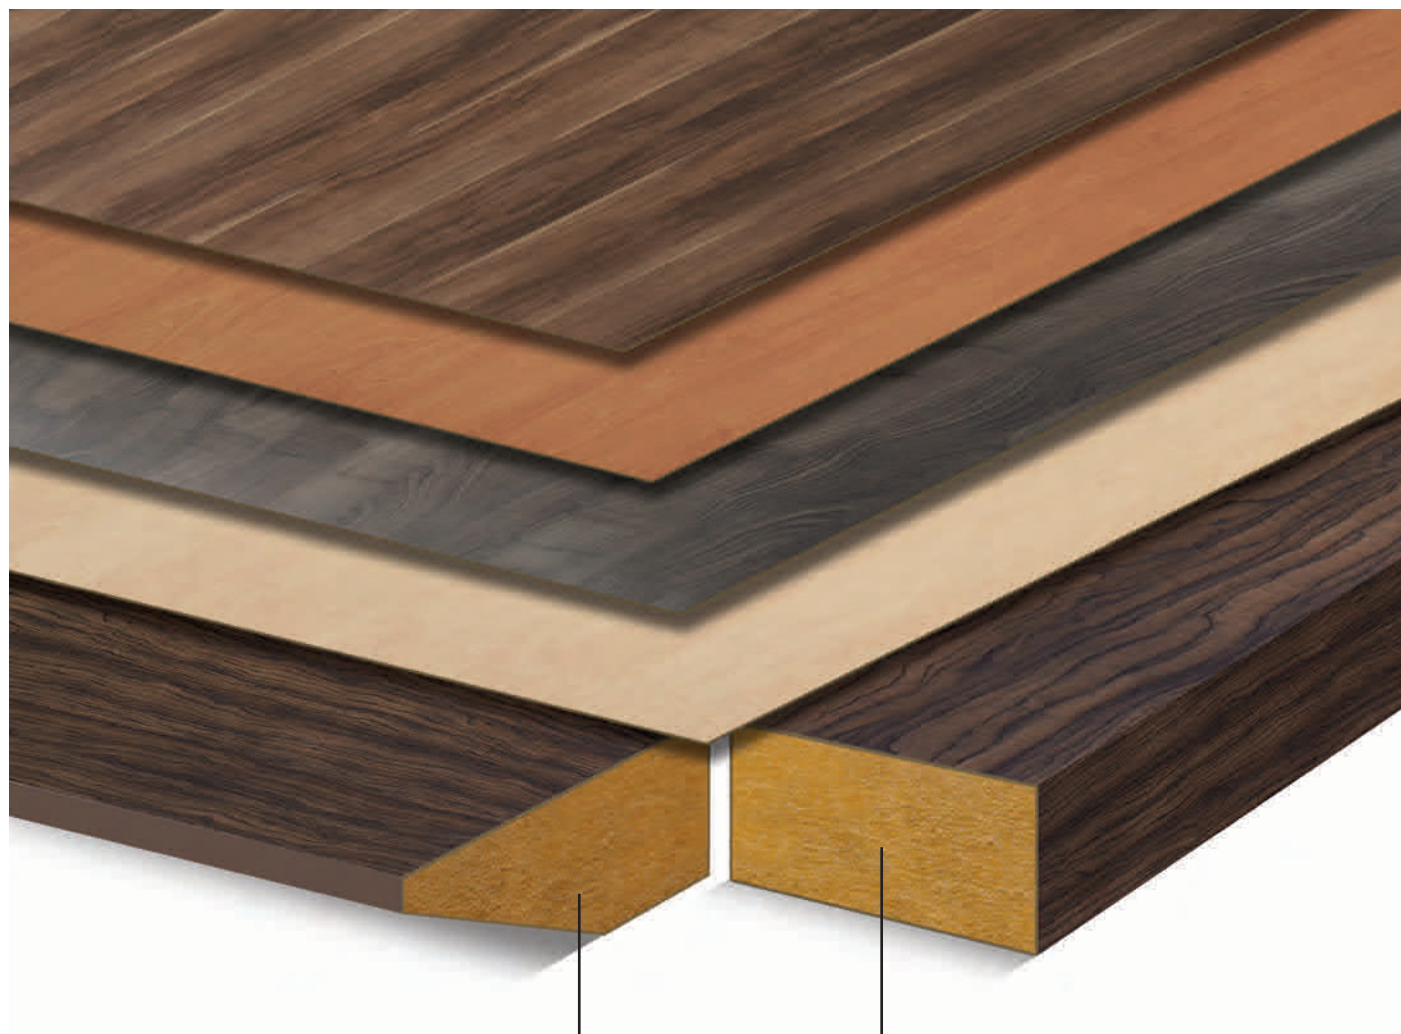

Woods

MDF edge

All wooden material used on the table top and benches is 25mm MDF core with a choice of laminate top finishes and edge designs. The MDF and laminate ensures that the finish is hard wearing and suitable for contract use.

**CHAMFER EDGE
25MM MDF**

Chamfered edge finished in a clear natural lacquer.
Chamfered edge stained to match the leg frame finish
on the Crew range only.

**STRAIGHT EDGE
25MM MDF**

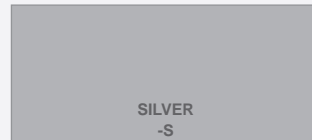

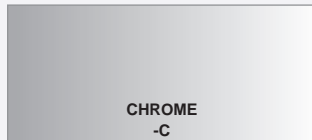

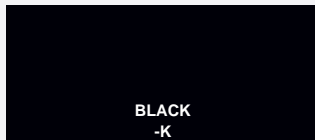

25mm Straight edge available with 2mm edging to
match laminate choice.

Edge design and colour

Dining, Poseur and Coffee table tops are all manufactured from a 25mm MDF core with your selected laminate finish. The edge design and edge finish of the table top must also be selected prior to ordering. Select from a choice of straight edge or chamfer edge designs.
