

ITÁLICA 50

The Ágora series litter bins have an elegant design, with balanced forms and different volumes, manufactured in metal or polyethylene and easily adaptable to any urban surroundings: historical centres, gardens and avenues, shopping malls and business parks.

The Ágora series is available with various capacities. The 50-litre Itálica litter bin is easily adaptable to any urban surroundings because of its aesthetics and dimensions. The 80-litre Diana and Atenea are more suitable for larger spaces, such as parks, avenues and shopping malls and, because of its size, the 130-litre Minerva litter bin is suitable for installation in city areas with very large public presence

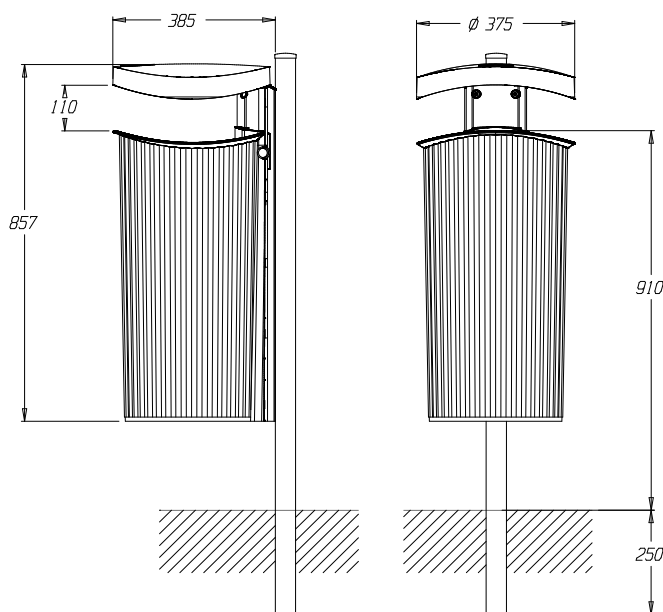

Contenur designs and manufactures Agora litter bins to procedures based on ISO 9001, and the Environmental Management System also has ISO 14001 Quality Management certification.

The Contenur Group guarantees the quality of all its products and installations and on request can also offer clients end-to-end product maintenance, including labour and materials. For more information, please contact our Technical Sales network.

Nominal Capacity	50 litres
Total Height	857 mm
Maximum width	375 mm
Maximum Depth	385 mm
Total Weight With Support	8.5 kg

TECHNICAL FEATURES

Injection moulded in solid-coloured high-density polyethylene stabilised against the action of both UV radiation and water and resistant to the effects of weather, detergents, fungi and bacteria.

The filling area is covered by a lid attached to the fixing bracket, providing almost 360 degrees of access for depositing litter.

The 50 litre high-density polyethylene basket is fitted with a locking system, employing a standard triangular key, preventing access other than by collection and maintenance staff.

The body incorporates a cigarette stubber; an ashtray can be supplied on request.

The vandal-resistant fixing post is made from I.H.A F-112 steel tube and electro-plated to prevent rusting.

The mounting system, produced in engineered plastic, provides a robust frame that stays fixed inside the bin and facilitates easy installation to lampposts, posts and fences.

The latest advances in vandal-resistant technology make the entire structure extremely robust. Low maintenance, with a smooth surface preventing build-up of dirt and facilitating easy cleaning.

They are designed with vertical fluting that reinforces the whole assembly providing originality and elegance. This fluting makes it difficult to stick posters and labels to the body of the bin.

Standard distribution colours: grey and burgundy.

Customisation:

Body – printing or badge – maximum size: 190 x 190 mm. Lid – photo transfer print – 370 x 150 mm or 78 mm diameter. Lid option – 78 mm diameter embossing insert.

Packaged in a cardboard box with the Contenur logo in black and stacked on a pallet 1820 x 1200 x 1900 mm.

The product is supplied ready-assembled for ease of transport and rapid installation.
