Jacking unit Only
Product Code: JAZXXH

Quality, Innovation,
Service and Flexibility

Load Rating

Jacking Castors are rated on a different principle to other castors. They are designed to lift the load off the floor and therefore each castor is liable to carry half the total load if they are not raised and lowered at the same time. To avoid any potential overloading we advise that each jacking castors load capacity should take at least 50% of the overall load capacity

$$\frac{\text{Unladen weight} + \text{Maximum Load}}{2}$$
