## NO MORE dog waste

- Unpleasant living environment
- Slipping hazard
- A significant budget for cleaning of public spaces
- Spread of bacteria

### Legislation

Dog waste is permitted only on roadside gulleys with the exception of those parts within the pedestrian crossings.

**All dog owners or guardians are obliged to immediately pick up dog waste by any appropriate means.**

This obligation is enshrined in the new Criminal Code (article R.632-1): "A second class fine is imposed for depositing, abandoning or throwing in a public or private place, with the exception of the places designated for this purpose by the competent administrative authority, rubbish, waste, materials or any other object of any kind whatsoever, if such deposit is not made by the person having the enjoyment of the place or with this person's authorisation ...". In the event of failure to respect this provision, **the offence can lead to a 2nd class fine** the amount of which varies according to the commune or region.

 Ref. **59919** - Ruby red RAL 3003

## Certification

### Softwood certified "Class 4"

The treatment system is known as autoclave, arsenic-free, in accordance with new European environmental directives. The treatment impregnates the wood to the core, making it rot-proof: resistant to rotting, insects and fungi. It gives the wood a slightly greenish colour that fades with time (See P.76).

All our wood products comply with the ministerial directive on the promotion of sustainable forest management (decrees of 05/04/05).

Bag held by mounting brackets

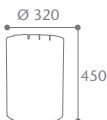

Easy emptying by removing the bucket (optional)

#### EDEN - WALL-MOUNTED BIN - 20L
