

# TecStore Range

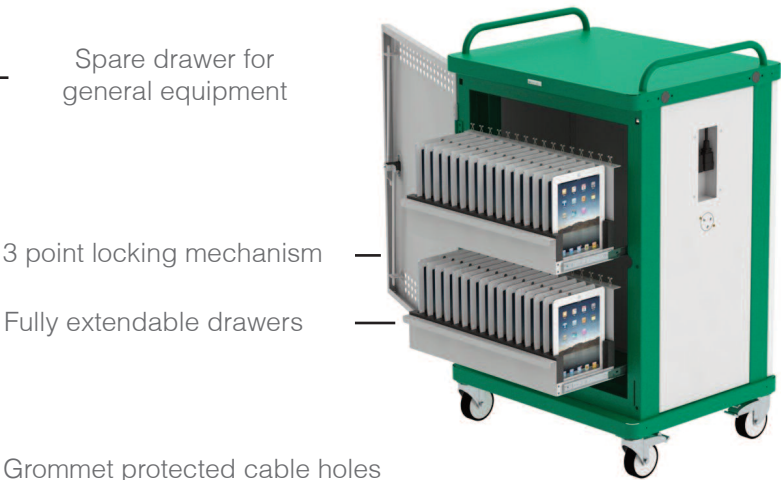

key features

## Safety Power Uncoupling

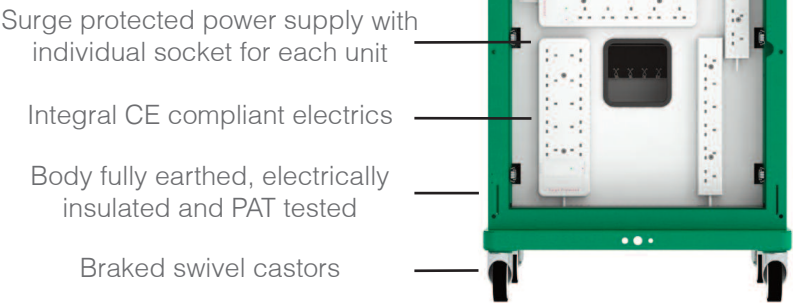

The recessed safety uncoupling power connection avoids cable damage from transportation while the trolley is still plugged into the mains. It also allows easy disconnection of the trolley.

LapStore

TabStore

## Standard Colour Options

# TabStore

charge, sync, deploy

A multi-functional security trolley designed for storing, charging and transporting tablet devices, ensuring devices remain fully functional and safe from theft

Accommodates **ALL** tablet devices including the Apple iPad, Google Nexus, Amazon Kindle, Samsung Galaxy and Microsoft Surface models.

### Features

**Compartment Size**

Foam drawer inserts can be manufactured to suit all tablet and iPad models

## Optional Sync Board Specification

TOP-TEC TabStore installs the market leading Cambrionix U16S sync board. Each trolley features a single or double board fitted in the rear of the unit, providing a USB port for each device and a single external port by which all stored devices can be updated en masse.

- Charges and syncs all mobile devices via a USB cable
- Updateable to support future releases of USB chargeable smartphones and tablets
- Firmware recognises connected device and loads the manufacturer's charging profile to deliver the correct power to each unit - saving energy and cost
- Devices can Sync or charge
- Power reduced to preserve battery life when charging is complete
- Designed and manufactured in the UK

# LapStore

storage and charging solution for all laptops

Available to store and charge up to 33 laptops, the LapStore is the most reliable and versatile trolley on the market, combining TOP-TEC's reputation for innovation and quality.

LapStore is now available in three sizes to ensure the size of your trolley is correct for your laptop dimensions. Choose the compartment size needed to fit your Laptops and number of Laptops, drawers and trolley height.

Compatible with **ALL** laptop charging units

## Features

- Storage for up to 33 laptops
- Secures and recharges all stored units
- Fully extending drawers for easy access
- 3-point locking with drill resistant locks
- Individual cradle for each charging unit
- Fully opening front (opens to 270°) and rear doors
- Safety power uncoupling
- Surge protected power supply
- External power socket for additional equipment
- Available in a range of colours and colour combinations
- Solid steel construction

## Options
